Preferred when issued	pw	PRWI	-#
Class "A" when issued	/Aw	AWI	.A#
Warrant when issued	/WSw	WSWI	+ #
Test	/TEST	TEST	~

* Not all products may be available
 ** Suffix immediately follows the root symbol in the symbol field

All symbols being made available for trading, as referenced in this circular, must be submitted to the Exchange in the appropriate "symbol" field **without the use of a separate symbol-suffix field**, and must contain both the "root" symbol and "SIAC/CQS Suffix" value immediately following the "root". In addition, these symbols must follow the "Preferred", "Preferred Class 'A'" and "Preferred Class 'B'" Suffix examples above.

The Exchange **will ignore any value placed in a symbol-suffix field**, and only process the order or quote using the value contained in the "symbol" field.

Examples for FIX users:

Tag 55 = AHLpA

Please note: CBOE does not process any value submitted in FIX Tag 65

CMi users: should continue to use the CBOE *direct* assigned Product and Class Key definitions to identify these product symbols.
